MY aim, when designing the decoration for a Presentation Address, is not merely to attract the outward eye, but also to appeal to the mind; to illustrate and give additional point to the subject matter, by means of symbolical ornament, appropriate emblems and miniature pictures encrusted in the initials, or woven into the borderings; so that every design derives a peculiar value, from the fact that it could not, without absurdity, be reproduced on any other address.

INTRODUCTION.

THE first issue of THE CANADIAN ALMANAC was published in the year 1847, by Scobie & Balfour, Toronto. It contained 104 pages, and according to advertisement on the title page, was sold for 7½d. or 5s. per doz. The next year the ALMANAC only contained 88 pages, some of the information given in the first issue being dropped. In 1850 the size was still further reduced to 80 pages, but since then the contents have steadily been increased, and the ALMANAC for 1897 contains 354 pages.

It is with some little pride that the publishers point to an unbroken history of fifty years of progress. And every Canadian should take pride in the history of our country from 1847 to 1897. It is the fashion some times to talk of Canada as unprogressive and slow. No doubt Canada has shared in the world-wide depression of the past decade, but if we look back fifty years, which is but a moment in a nation's life, we will see how great has been the development of our country, and find much reason to thank God and take courage.

In 1847 there was no Grand Trunk Railway, it was not commenced until 1852, while as for the Canadian Pacific Railway it was not even dreamed of. The Great North West was thought to be a barren wilderness, useful only as a hunting ground for the fur trade.

In 1848 the St. Lawrence canals were opened for navigation, and in 1850 work was begun on the Northern Railway, which was opened for traffic from Toronto to Bradford on 13th July, 1853, this being the first locomotive railway in Upper Canada. In 1895 there were 15,977 miles of railway in operation in Canada, a growth in 42 years that is simply marvellous. Turning now to the question of population, we find that in 1851 the population of Upper Canada was 952,004 ; Lower Canada, 890,261 ; New Brunswick, 193,800, and Nova Scotia, 276,354, making a total of 2,312,419. The population of the Dominion in 1891 was 5,034,650, and we have reason to believe that it is much larger now.

In 1851 the Postal system was transferred from the British Government to the Provincial Government. The use of postage stamps was introduced, the rate being 3 pence per ½ oz. It was not until the year 1858 that the decimal system of currency was adopted.

Many other evidences of progress can be gleaned from a fyle of the CANADIAN ALMANAC, and much encouragement for the future. We have a country of great resources, a healthy climate, a law-respecting people, and the freest government under the sun.

With reference to the future, the publishers desire to improve and enlarge the ALMANAC each year, and are glad to receive suggestions from their correspondents to that end. Great effort is made to have all the information given accurate. Whenever possible, official records are used, but in spite of every care errors will sometimes creep in. If our subscribers will advise us of any inaccuracy it will be corrected in the next issue.

The Editor wishes to give his hearty thanks to the many friends throughout the Dominion who have so kindly assisted in revising the information from year to year, and to all correspondents as well as all readers of this book, Publishers and Editor unite in wishing a Happy and Prosperous New Year.

TORONTO, November, 1896.

Explanation of the Articles in the Calendar.

These pages are calculated for Toronto, Quebec and Winnipeg, and for ordinary purposes will serve with sufficient accuracy for every city in the Dominion of Canada. For Latitude and Longitude of Observatory see page 16.

NOTE—Standard times* are given in all columns headed Toronto, Quebec and Winnipeg.

The times* of the SUN'S RISING AND SETTING† are given for the upper limb, and are corrected for refraction for Toronto, Quebec and Winnipeg.

The standard times* both for the rising and setting of the Moon's centre are given for every day for Toronto, Quebec and Winnipeg.

The column, SUN ON MERIDIAN, gives the time that a watch keeping local mean time should show when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shows to the nearest tenth of a day the Moon's age at Toronto mean noon.

The column, UPPER TRANSIT OF POLE STAR, shows for every day the mean time* at which the Pole Star makes its upper transit across the meridian of longitude 4h. 46m. W. It passes the meridian twice on October 11.

The time at which the lower transit of the Pole Star occurs may be found by adding 11h. 58m. 2s. to the time of the preceding upper transit.

The seven last columns are calculated for Lat. 45°, Long. 4h. 46m. W., but will serve with sufficient accuracy for the whole of Canada.

GREATEST ELONGATION OF THE POLE STAR.—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 45°. When the greatest elongation corresponding to any other Latitude is required, the number given in the column should be corrected by means of the following Table.

Latitude	42°	43°	44°	45°	46°	47°	48°	49°	50°
1st Correction for Degrees	−5′ 10″	−3′ 32″	−1′ 49″	0′ 00″	+1′ 55″	+3′ 55″	+ 6′ 3″	+8′ 17″	+10′ 39″
2nd Correction for each minute of latitude	+ 1″.6	+ 1″.7	+ 1″.8	+ 1″.9	+ 2″.0	+ 2″.1	+ 2″.2	+ 2″.4	+ 2″.5

The 1st correction for the degrees of latitude is to be subtracted from the greatest elongation given in the calendar or added to it, according as the degrees of latitude are less or greater than 45°.

The 2nd correction, which is always additive, is found by multiplying the number given in the third line of the Table by the number of minutes in the latitude.

Thus for latitude 43° 20′..1st correction = − 3′ 32″ 2nd correction + 1.7 × 20 = + 0′ 34″
" " 47° 40′.. " " = + 3′ 55″ " " + 2.1 × 40 = + 1′ 24″
" " 45° 10′.. " " = 0′ 0″ " " + 1.9 × 10 = + 0′ 19″

MOON'S PHASES.—This Table gives the times (standard 75th meridian)* when the Moon passes the geocentric longitudes of 0°, 90°, 180°, and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

From the time of the upper transit of the Pole Star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table.

Latitude	42°	43°	44°	45°	46°	47°	48°	49°	50°
	h m s	h m s	h m s	h m s	h m s	h m s	h m s	h m s	h m s
Constant	5 54 31	5 54 21	5 54 11	5 54 1	5 53 50	5 53 39	5 53 27	5 53 16	5 53 3
Difference for 10′ of latitude.	−1.7	−1.7	−1.7	−1.8	−1.8	−1.8	−2.0	−2.2	

*In the present Almanac, the hours are numbered from 0 (midnight) to 23.

† Although these times are calculated for Toronto, Quebec and Winnipeg only, the standard times at other places not differing much from them in latitude may be obtained with sufficient accuracy for ordinary purposes, by adding four minutes for every degree west, and subtracting four minutes for every degree east of these places.

Star Table.

From the times of the upper transit of the Pole Star may be derived, with the aid of the following Table, the times of culmination, and of the rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude.

To ascertain when any star found in the following Table will be on the meridian, *add* the number in the left-hand column of figures to the preceding meridian transit of the pole star given in the calendar. To find the time of rising of the star, *subtract* the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the *setting* of a star, *add* the same number to the time of its meridian passage. Those stars marked (....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

The Dominion of Canada has an area of about 3,315,647 square miles, or, including its water surface, 3,456,383 square miles, is about 3,500 miles from east to west and 1,400 miles from north to south, and consists of the provinces of Ontario and Quebec (formerly Upper and Lower Canada), Nova Scotia, New Brunswick, Manitoba, British Columbia, Prince Edward Island and the North-west Territories (which latter contain the vast territory formerly under the control of the Hudson's Bay Company). It therefore comprises the whole of the northern half of North America, with the exception of the United States Territory of Alaska on the west, and Labrador, which is under the control of the Government of Newfoundland, on the east. It is bounded on the north by the Arctic Ocean, on the west by the Territory of Alaska and the Pacific Ocean, on the south by the United States, and on the east by the Atlantic Ocean.

During the period covered by the table the train mileage increased 130 per cent.; the number of passengers carried 169 per cent., and the tons of freight transported 280 per cent. The earnings increased in the same period 140 per cent., and the working expenses, instead of keeping pace with the earnings, increased only 107 per cent. The last column in the table shows the proportion of expenses to receipts year by year. Taking 1895, there were only three years in which the proportion of earnings consumed in expenses was as small.

There was a decrease in the total receipts in 1895 of $2,767,041 as compared with the previous year. The working expenses showed a decrease of $2,468,764, and the proportion of expenses to receipts was 70 per cent., being 1 per cent. lower than in 1894.

The population and assessed values remain almost the same as compared with 1892, but the tax bills have increased at the rate of 38 cents per head of population over 1892, or an advance of $1.63 or 33 per cent. since 1886. The debenture debt shows an increase of $7,362,268 in the past three years. Over 60 per cent. has been added to this item since 1886. The interest charges are equivalent to one-fifth of the taxes imposed.

TIDE TABLES FOR HALIFAX AND QUEBEC, 1897.

These Tide Tables, with Tidal Differences for other places, are supplied by the Tidal Survey Branch of the Department of Marine and Fisheries of the Dominion of Canada. They are based upon direct observation of the tides, obtained by means of self-registering tide-gauges which are kept in continuous operation day and night throughout the year. The records are reduced by the latest methods of analysis; and the computation of the tables is made by Mr. E. Roberts, F.R.A.S., of the Nautical Almanac Office, London.

The TIDAL DIFFERENCES, when applied to the Tide Tables, give the time of high and low water at other places in Standard Time. The differences applicable to the Halifax Tables are derived from the Establishments given in the Admiralty list. They will therefore be correct at full and change of the moon, and approximate only at other times of the month. The differences for places above Quebec are derived from simultaneous observations at seven points during two complete months, taken by Mr. R. Steckel of the Department of Public Works. These differences are correct while the water in the River St. Lawrence is at its ordinary level; but the times of the tide which they give may be slightly early or late respectively, at the seasons when the water is unusually high or low. The differences below Quebec are based upon direct simultaneous observations from the tide-gauges at Quebec, Father Point, and Anticosti, taken throughout the course of the year 1895; and compared with the differences of Establishment for intermediate points as given in the Admiralty list. These observations show the time of the tide as given by these differences, and will be correct throughout the course of the month.

Engineer in Charge.

Chief Engineer.

NOTE.—A comprehensive survey of the tides and currents of the Gulf and Atlantic coast of the Dominion is now being prosecuted by the Department of Marine and Fisheries. Tide gauges are in operation at seven main stations: Quebec, Father Point, South-west Point of Anticosti, Forteau Bay, St. Paul Island, Halifax, and St. John, N.B., and when sufficient records have been obtained and reduced, these main stations will be used as bases of comparison for other places in their respective neighbourhoods.

The permanent and tidal sets of currents in various parts of the Gulf are being accurately measured by Mr. Dawson, engineer in charge of the survey. The results hitherto obtained have been published, and copies of these publications may be had, on application, from the Department of Marine and Fisheries, Ottawa.

The Time used is Intercolonial Standard, for the 60th meridian; or four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The Height is measured from a datum plane about 1 foot 6 inches below the level of low water at Ordinary Spring Tides; which is the Datum of the Admiralty Charts. Hence to obtain the heights above the Admiralty Datum, deduct 1·5 feet from the height above given.

The TIME used is Eastern Standard, for the 75th meridian; or five hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of low water at Ordinary Spring Tides; that is, from the same datum as used for the Admiralty Chart of Quebec Harbour.

Your attention is also directed to the following provisions of "An Act respecting Commercial Treaties affecting Canada," Chap. 3, 58—59 Vict., viz.:—

"1. So soon as *The French Treaty Act*, 1894, chapter two of the Statutes of 1894, is brought into force by proclamation of the Governor General, the advantages granted to France by the treaty with that power mentioned in the said Act, with respect to its commerce with Canada, shall extend to any and every other foreign power which by reason of the operation of such treaty is, under the provisions of a treaty with Great Britain, entitled, in whole or in part, to the same or to the like advantages with respect to its commerce with Canada, to the extent to which in manner aforesaid such other foreign power is entitled thereto; and such advantages shall continue to so extend to such other foreign power so long as the said Act remains in force, or until the right of such other foreign power to such advantages under its treaty with Great Britain is sooner determined.

3. The advantages so granted to France by the said treaty shall extend also to Great Britain and to the several British colonies and possessions with respect to their commerce with Canada, so long as France continues to be entitled to such advantages; and during the period for which France is so entitled to such advantages, all laws inconsistent with the enjoyment thereof by Great Britain and such British colonies and possessions shall be suspended to the extent to which they are so inconsistent."

The Foreign Powers entitled to the same advantages under the provisions of the said Act, as are granted to France by the Treaty in question, with respect to its commerce with Canada, are:—

COST OF COLLECTING CUSTOMS REVENUE.

The cost of collecting customs revenue has been reduced very considerably since the first years of Confederation. In 1868, for every $100 of duty collected $5.41 was expended, as compared with $5.13 for every $100 in 1895. The large area of the Dominion, the extent of its frontiers, and the number of ports of entry it is necessary to keep up being considered, the cost of collection is moderate In the United States in 1895 it was 4.42 per cent., and in the United Kingdom 4.15 per cent.

By adding together the amounts received from customs and excise duties on spirits, wine, beer and cider, malt liquor, malt, tobacco, snuff, cigars and cigarettes during 28 years, we have the sum of $212,157,000. The total amount expended by the Federal Government on the construction of railways, canals, public buildings, including the payments on account of the Canadian Pacific Railway, the North-west Territories, and debts allowed to provinces, is $200,143,171. The duties collected from liquors and tobacco have, therefore, paid for the cost of the Intercolonial and connecting railways, the contribution of the Federal Government in aid of the Canadian Pacific Railway, the purchase and subsequent cost of the North-west Territories, including Manitoba, the public buildings at Ottawa, all the canals, including the Sault Ste. Marie, and all the post offices and other public buildings erected all over the Dominion since Confederation. The liquor drinkers and the tobacco users have been well utilized.

FORMS OF GOVERNMENT THROUGHOUT THE WORLD.*

By Dr. J. G. Bourinot, C.M.G., F.R.S.C., Clerk of the Canadian Commons, Author of "How Canada is Governed," and other Works on the History and Government of Canada.

I.—INTRODUCTION.

In this necessarily very brief survey of the forms of government throughout the world, I have found it most convenient for purposes of reference to arrange the subject under the headings of "countries," "executive power," and "legislative power," with some mention of local or municipal government under the latter. I commence with the British Empire, as embracing the countries in which Canadians have naturally the deepest interest. After Great Britain and Ireland follow the colonies and dependencies of the empire, including India, in alphabetical order. Then come the other countries of the world in the same alphabetical order, commencing with the absolute monarchy of savage Abyssinia, nominally under the protectorate of Italy, while all colonies and dependencies follow the reference to their particular sovereign state. I have also thought it advisable, for purposes of reference, to add the area and population of every country.

A review of the methods of government in the world show a survival of the oldest forms, though in a more or less modified state. We see still in America examples of triba communities; in Asia and Africa the organized patriarchal forms, and the nomadic hordes and camp nations. We can see illustrations of the division of organized government that was many centuries ago given by that master of political science, the Greek Aristotle. Although his analysis of the forms of government was far from exhaustive, and his descriptions are not quite adapted to modern types, his enumeration still serves as a most excellent frame on which to hang an exposition of these forms for studies and discussion. We see monarchy, or the rule of one, in Russia, China and Turkey; aristocracy, or the rule of the few in a waning degree in Germany and Austria, where nobles still exercise large power in houses of peers and in government; democracy, or the rule of the many, in the United States, in the South American republics, and in numerous countries to which popular government has extended itself within this century. We see also the truth of his remarks that monarchy can assume the degenerate shape of tyranny; aristocracy, the degenerate shape of oligarchy; and democracy, the degenerate shape of anarchy or mob rule. Under modern conditions aristocracy, as a form of government, is fast disappearing before the growth of democracy. In England the power of the peers was effectually broken by the introduction of responsible or parliamentary government in the reign of William III. and the passage of the first Reform Bill of 1832. The peers of the realm now derive their influence chiefly through their connection with the political party in power and the ministry that owes its existence to the commons. On the continent of Europe, the houses of peers are still powerful, but their power as a house is chiefly derived not from purely aristocratic influence, but from their share in the work of legislation as a branch of the legislature, and from the presence in the majority of cases of life or elected members, representing important class, educational, and other interests that bring the bodies into touch with the more popular elements of the country. Monarchy still exists as an important form of government. The present government of Russia is abnormal in the Europe of to-day, as abnormal as that of the Turk,—"a belated example of those crude forms of politics which the rest of Europe has outgrown." Otherwise the monarchies of Europe are limited by the resolutions of the popular parliaments. While monarchy is more or less limited and aristocracy seems on the point of disappearing, democracy, as a form of government, is in a fair way to prevail universally. Ever since the rise of popular education in the last century, and the success of parliamentary government in

*Revised and corrected from latest available authorities.

England, and popular government in the United States, the forces of popular thought have made a steady headway throughout the world. But we have seen that democracy may mean license and anarchy, as Aristotle long ago foresaw, and none but a Cæsar or a military leader can at times bring it back to reason and order. Citizens under monarchical rule may be, and often are, more fortunately placed as far as personal liberty is concerned than the citizens of pure republics in South America. In those countries tyranny as brutal as that of Caligula or Commodus has reigned. Out of fourteen presidents of the Bolivian republic, thirteen have died assassinated or in exile, and no one can safely conjecture the final fate of any of the former colonies of Spain. Even in the United States, despite the influence of English institutions and the English governing instinct for law and order—the saving principle always in that great federal republic—democracy at times, under the sway of mob rule and party spirit, has seemed clearly dangerous to public security and good government.

But a close study of forms of government is encouraging since it shows on the whole a steady growth of representative institutions, and the extension of popular rights under hopeful conditions of law and order. The theory of national sovereignty has been fully accepted in France, Italy, Spain, Portugal, Holland, Belgium, Greece, and the Scandinavian States. In Germany it has not been yet acclimatized, but while the emperor's will is still a powerful factor in government and legislation, we can see the influence of the English principles of parliamentary and popular government. In Spain we still see the influence of the military spirit, and no one would be surprised to see bayonets in the Cortes at certain political crises. In France, the results of late have been encouraging, and it is quite possible that France may still give us additional evidences of the strength of parliamentary government outside of countries of English origin.

England is the mother of free governments throughout the world, even among nations that do not speak her tongue. Her principles have more or less influenced the great communities of Europe, as I have just shown. Her self-governing dependencies have closely followed her parliamentary system of government, and year by year we see colonies emerging from a state of pupilage and assuming large rights of self-government. It is true that in Jamaica there has been a step backward, but it has been forced by abnormal conditions of depressed trade and the existence of a large and idle coloured population, not equal to the requirements of freedom and citizenship. The British empire now comprises forty-two distinct and independent governments. In addition to these there are a number of scattered dependencies under the dominion or protection of England, which do not possess regularly formed administrations and vast territories controlled by English chartered companies protected by the queen. Of the forty-two administrations, eleven have elected assemblies and responsible government; the others are (1) crown colonies in which the crown "has the sole control of legislation while the administration is carried on by public officers under the control of the home government"; or (2) colonies "possessing representative institutions but not responsible government, in which the crown has no more than a veto on legislation, but the home government retains the control of public officers."

While the old world is the home of the parliament and a responsible ministry, the new world is that of a congress, and an executive not having seats in or directly responsible to the legislature. In some countries of Europe, and in England's dependencies, the English model is directly followed, but the South American republics have taken the American system with some modifications. In Canada alone, in America, is responsible or English parliamentary government seen in complete operation. Nevertheless it is England that has given representative government to the world at large. The system of the United States is based on English institutions of a century ago, and on the legislative system of the old English colonies. It is the principle of federation that has been fully expanded in the United States. It has formed the model for even Switzerland and Canada, and developed the idea all throughout the world. In Germany, Austria, Hungary, Norway and Sweden, the West Indies, and in a few South American republics, we see this federal idea solving important problems of political government. In Australasia there is now before the legislatures and people a scheme of union based

on that of the United States and Canada, and the time is probably not far distant when those distant English communities will enter into the rank of federations with a great future before them as a united dominion of the empire. The federal idea in co-operation with responsible or representative government must sooner or later rule the world.

In every country possessing representative government we see a parliament or diet or congress, or some other assembly conveying the same political thought in the particular language of a nation or state. In the majority of cases, two houses prevail. Canada occupies an exceptional position among English dependencies with responsible government, since five out of the seven provinces of the dominion have abolished their legislative councils or upper branches of the legislature. Those countries in America that have followed the model of the United States possess a senate or upper chamber (Nicaragua excepted). One chambered legislatures prevail in Servia, Bulgaria, Greece, in the landtags of Austria, and in the diets of the minor German states except those of the free cities. Apart from these legislative bodies, the European communities have two chambers, varying from that of Norway (where, after a single general election, a certain number of the deputies returned are told to make an upper house,) to the ultra-aristocratic house of magnates, established from the earliest time under the ancient Hungarian constitution. Hereditary peers, generally mixed with life peers and elective peers, are still common in the second chambers of the continent of Europe; they are found in Cisleithan Austria, in Prussia, in Bavaria, in some of the smaller German states, and in Spain and Portugal. Life peers also occur by themselves but the crown is generally directed by the constitution to select them from certain classes of distinguished men. The best example of an upper house formed by this method is the Italian senate. In many states the mode of electing senators or peers is indirect, either the electorate is different, or provinces, or states or communes elect, while the deputies of the popular branch are taken from the nation at large. Even the senate of the United States is founded on inequality of representation. This distinction between the elections of the two houses shows a fundamental doubt as to the safety of the democratic theory.

The second or popular chamber, however, is the most powerful. All elected or second assemblies have the initiation of money votes, and taxation. The senate of the United States is probably the sole instance of a legislative body which is not inferior in legislative importance to the lower house, and possesses special functions—the approval or rejection of important appointments and the confirmation of treaties—not enjoyed by any similar body in the world. In the Spanish cortes, however, either house may take the initiative in all cases of legislation. In the Netherlands, the upper house cannot amend the bills of the lower branch, but must accept or reject them in their entirety. The British house of lords cannot initiate or amend a money bill; neither can the Canadian senate nor the upper houses of any of the British dependencies. The senate of the United States, however, may amend while it cannot originate a revenue or money bill. The upper house of the Prussian landtag cannot amend the budget. In some countries there is a union of the two houses to consider and pass bills on which one or the other disagrees. This is a useful precedent, though it is borrowed from the system of the United States. In some German states a permanent committee represents the house or houses then not sitting—a *quasi* responsible government in practice.

Universal suffrage prevails generally in North and South America, including the provinces of British Columbia, Manitoba, Ontario, New Brunswick and Prince Edward Island. In a few South American states, and in Massachusetts some educational tests are necessary. Costa Rica limits the franchise to those who can live respectably, and Mexico to "all respectable male adults." Hayti requires her negro citizens to have "some vocation"—a mere euphemism certainly. In the states of Colorado, Utah and Wyoming, women can vote at state, as well as at municipal elections, and the same is true of New Zealand and South Australia. In Europe, property, income, and the payment of taxes govern. The German reichstag and French chamber of deputies are chosen by general suffrage. But in no part of Europe except Austria can women vote even on a property qualification. In some countries a premium is placed on learning or education, viz.: Victoria, Tasmania, Ecuador, Bolivia, Chili, Cape of

Good Hope, Malta, Hawaii, Hungary, Bremen, and other states. In Montenegro, men capable of bearing arms are the electors. In a few countries the age of electors is limited to 25, but the ordinary age of manhood, 21, may be considered the rule.

Qualifications for members of the houses are required generally on the lines of age, but except in a few of the older states of Europe property qualification is now not necessary for the popular chamber. The age of the elected or appointed members of the upper houses is generally greater than that of the lower, 30 being the average. The number of members in upper houses—chiefly those elected or appointed—is, as a rule, lower than that of the popular chamber. The English house of lords, however, is not very much less than that of the commons, but, it must be remembered that only a small proportion of peers ever take their seats or vote. The Hungarian house of magnates actually counts a few more than the popular branch, while the new Japanese parliament preserves a parity.

The relations to the executive show great divergence. Countries of the English type, as I have already intimated, display the ministerial responsibility well developed. On the continent generally the connection is somewhat slighter. In Sweden and Norway it is undefined. To be sure the German constitution does not create a ministry responsible to the legislature. But the system of government "seems to be in a transition stage between the one-man rule of *quasi* absolutism under constitutional forms, and the liberal *regime* of modern times." There is no ministerial responsibility in Switzerland. Between the anglo-continental system and the congressional plan, there is a very wide divergence.

The sovereign of a monarchy and the president of a republic has, with a few exceptions, some share, often considerable, in legislation. The German emperor has vast powers;—the other European constitutional sovereigns far less. The American president has far greater power in legislation than the queen of England, since he can stop any congressional legislation when there is not a two-thirds majority in both houses to over-ride his veto. The king of Sweden has an absolute veto in Sweden, and promulgates various laws, though in his office as king of Norway he has a suspensive veto only, and possesses some temporary powers when the storthing is not sitting.

The French national assembly has the important duty of electing the president of the republic, while the Swiss federal republic—the home of the "initiative" and the "referendum"—chooses the entire executive or federal council. Members of this council can sit and speak but not vote in the chambers. The federal assembly elect the president and vice-president from among the members of this council. Here are more illustrations of distrust of democracy.

It may be said that the principles of representative and popular government have, indeed, made remarkable strides within the latter half of this century. The latest acquisition is Japan, which has already made a claim for a high place among civilized nations and proved its capacity to understand the principles of parliamentary government as well as the rules and conditions of modern warfare. Another half-century must witness an extraordinary development in the same direction of popular government. The great English poet wrote a political truth when he told us years ago:—

> "For through all the ages an increasing purpose runs,
> And the thoughts of men are widened with the process of the suns."

II.—GOVERNMENT OF THE BRITISH EMPIRE.

Population, 345,000,000; with protectorates, about 382,000,000. Area without protected territory, 9,144,735 square miles.

GREAT BRITAIN AND IRELAND.—Monarchy under parliamentary government. Population in 1891, 37,740,283: England, 27,560,000; Wales, 1,510,034; Scotland, 4,025,064; Ireland, 4,704,750. Area, 121,115 square miles: England, 51,000; Wales, 7,378; Scotland, 30,000; Ireland, 31,759.

EXECUTIVE POWER.

A sovereign, at present a queen, exercising all powers of executive government through a cabinet composed of certain sworn privy councillors, who act as advisers of the crown, and conduct the public administration in accordance with law and constitutional usage. The crown is hereditary, but subject to such limitations as may be imposed by parliament—*i.e.*, by the crown, lords and commons. The head of the administration is the

premier, or first minister, who is the choice of the crown; he selects the members of the cabinet and ministry, with the approval of the sovereign. The cabinet consists, at present, of 16 ministers, of whom the first lord of the treasury is generally premier. In addition to the inner or advisory council, called the cabinet, there are other ministers holding subordinate positions in the government, but who also retire with the cabinet in case of resignation or defeat. The whole number of persons comprising the government of England, including the chief officials for Scotland and Ireland, is 56. The government hold office as long as they retain the confidence of the house of commons. The common law is the basis of justice in Great Britain and Ireland, and in all colonies and dependencies of the crown. Wherever, in the latter, the civil or other law is in force, it will be stated below in the case of the particular colony.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.

The parliament of Great Britain is composed of the crown, lords and commons. The lords consists at present of 576—archbishops (2), bishops (24) and peers, the latter divided into 22 dukes, 22 marquesses, 119 earls, 26 viscounts, and 308 barons. Six princes of the royal blood have also seats in the house. Scotland is represented by 16 peers, elected for each parliament, and Ireland by 28 representative peers elected for life. The speaker is the lord high chancellor of England, who is a member of the cabinet, and retires with a change of government. The house of lords has co-ordinate powers of legislation with the house of commons, except as respects taxation or money bills. It cannot initiate or amend such bills, but it may under exceptional conditions reject them as a whole. The house of commons is the body where the chief political power rests. It consists of 670 members, elected by the legal electors of Great Britain and Ireland, as follows: England 465, Wales 30, Scotland 72, Ireland 103. All elections are now by ballot. Since the reform bill of 1832 the franchise has been widely extended to all classes who have a stake in the country. The suffrage is now divided among freeholders, copyholders, leaseholders, occupants of lands and tenements, and lodgers of a specified value. The house of commons lasts for seven years, unless sooner dissolved by the crown with the advice of the cabinet. Parliament is summoned, prorogued and dissolved by the sovereign. The speaker and deputy speaker of the commons are elected by the house for the duration of the parliament. Members do not require a property qualification, but they must be English citizens of the age of 21 years, not bankrupts, or idiots or criminals. Members are not paid. The system of local government has been much simplified quite recently. England and Wales are now divided into 62 administrative counties, including the city of London. In every county there is a council composed of aldermen and councillors. Aldermen are elected for six years, half of them retiring every third year. A councillor is elected for three years. The counties are again divided into "urban districts" and "rural districts," in which councils are elected. The parish continues to be a unit of local government, and the duties formerly performed by "vestries" are now discharged by "parish meetings" and "parish councils." In cities and towns the affairs are administered by municipal corporations, consisting of mayor, aldermen and burgesses; the mayor and aldermen are elected by the council, and the burgesses by ratepayers. Women can be elected only to district councils and parish councils, including the London vestries. Married as well as single women can vote at parochial elections. In Scotland there are parish councils, and municipal bodies in towns and cities. The councils of the latter consist of a provost and bailies. In Ireland there is no system of representative local government, but in counties the authority is the grand jury. In some towns and boroughs there are corporations consisting of mayor, aldermen and councillors. In the majority of towns local government is entrusted to commissioners, appointed by the Irish government.

Canada, Dominion of, a federal dependency, with representative and responsible government. Population, about 5,000,000; area, 3,315,647 square miles (exclusive of waters).

EXECUTIVE POWER.—The queen represented by a governor-general, appointed by the crown, and advised by a cabinet chosen from members of the privy council of Canada, and consisting of 12 ministers, holding departmental offices, besides one or more ministers without office. The government holds office as long as they have the confidence of the popular branch of parliament. The principles of parliamentary government are those of England. The common and criminal law of England prevails in all the provinces except Quebec, where the old French civil code and English criminal law are in force.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.—The queen, senate, and house of commons. The senate is composed of 78 members, when full, appointed by the crown, possessed of property qualification and of the age of 30 years. The speaker is chosen by the crown. It has co-ordinate powers of legislation with the house of commons, except in the case of revenue, taxation, or money bills. Though it cannot initiate or amend such bills, it may reject them under extraordinary circumstances. Members are paid $1,000 for a session of over 30 days, and a sum for travelling expenses at the rate of 10 cents a mile going and returning. The house of commons consists, at present, of 213 members—chosen on a very liberal franchise based on property, income and wage-earning, with residence and citizenship. Members require no property qualification, but they must be of the age of 21 and British subjects, not disqualified by law. The speaker is chosen by the commons. Parliament has a legal existence of five years unless sooner dissolved by the governor-general, and meets once every year. Members are paid the same as senators. As Canada possesses a system of federal government, her legislative powers are limited to certain subjects of dominion or national import, set forth in the written constitution, or British North America Act, of 1867, with the residue of power not expressly given to the provinces in the federal government. All the provinces of Canada except Prince Edward Island possess a very complete system of municipal government which entrusts certain *quasi* legislative powers to councils in municipal divisions known as cities, counties, townships, towns, villages and parishes, and elected by ratepayers. The rules and usages of procedure of the Canadian parliament and of the legislatures are based on those of the imperial parliament. The closure does not exist in Canada.

Provinces and Territories of the Dominion, viz.—Nova Scotia, population, 450,396; area, 20,600 square miles. New Brunswick, population, 321,263; area, 28,200. LEGISLATIVE POWER AND LOCAL GOVERNMENT.—In Nova Scotia and Quebec there is a legislative council of 20 and 24 members respectively, appointed by the lieutenant-governor in council of each province. The assembly in these provinces consists of 38 and 73 members respectively, elected for four years in Nova Scotia, and for five years in Quebec, on a limited franchise based on property and income. The speaker of the legislative council is appointed by the crown. In the five other provinces there is only one house, an elected assembly, viz., Ontario, 94 members; New Brunswick, 41; P. E. Island, 30; Manitoba, 40; British Columbia, 33. In all these provinces there is manhood suffrage, limited by residence and citizenship, but in P. E. Island 15 are elected on a special real estate qualification.* In all of these provinces the duration of the assembly is four years, unless sooner dissolved. Sessions are annual. In all of the provinces the speakers of the assemblies are elected by the members. In both houses members are paid. Members require no property qualification. The legislative powers of the legislatures are defined by the British North America Act of 1867. Widows and unmarried women, when taxed, can vote at municipal elections in Ontario and the North-West Territories; in Manitoba and British Columbia, all women who are taxed in their own right can vote at such elections.

North-West Territories, divided into districts, viz.: Alberta, Assiniboia, Athabasca, Saskatchewan, with representative but not responsible government. In addition to these partially settled and organized districts, the following divisions have also been made in the unsettled region; Franklin, Keewatin, Mackenzie, Ungava, and Yukon. The common affairs of the united kingdoms are considered by the king, with the assistance of a council of state, composed of Swedish and Norwegian ministers.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.—1. In Sweden there is a council of state of 10 members; a diet or parliament of two houses; an upper or first house of 150 members elected by provinces and town corporations for nine years; a lower or second chamber of 230 members, elected by residents of rural districts and towns for three years on a franchise based on property and income. The storthing, when elected and assembled for business, is divided into two houses, the "lagthing," or one-fourth of the storthing,

and the "odelsthing" or remaining members of the storthing. The odelsthing has the whole right to inspect and consider public accounts. The federal assembly elects president and vice-president one year and a bundesrath or federal council for three years. Members of the council can sit and debate but not vote in the two chambers.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.—The principles of initiating measures by popular vote (the initiative), and of submitting acts to direct vote (the "referendum") are in force in this republic. The legislative powers of the nation are set forth in the constitution. Each of the cantons has a system of local government based on the fullest possible expression of the popular will. Legislative assemblies and executive councils exist, and in a few cantons there are landsgemeinden or assemblies of the male citizens for the purpose of making laws and appointing their administrators. The "initiative" and "referendum" also exist to a considerable extent. The cantons or states are sovereign and only limited by the constitution.

EXECUTIVE POWER.—President, elected for four years under the constitution by electoral colleges in each state equal to the whole number of its senators and representatives in congress; but practically the election is by the direct vote of the people. Each political party nominates a set of electors on a presidental ticket and the people vote directly for them. Under the constitution the electors meet in each state on a particular day and invariably cast their votes in accordance with the result of the election. There is also a vice-president elected by the same political method. The president is head of the executive, and has a veto over the legislation of congress, but it can be over-ridden by a two-thirds majority in each house. He is aided by a cabinet of eight secretaries of state and heads of departments, appointed by himself with the approval of the senate, but having no seats in or responsibility to congress. In case of death, resignation or disability of the president, the vice-president succeeds, and after the latter, the secretary of state or other members of cabinet in order of seniority until a new president is appointed or the disability is removed. It can also amend bills for raising revenue, which alone can originate in the house of representatives. The vice-president is *ex officio* president of the senate, which may also appoint a temporary president. The speaker of the house is elected by its members. Members of both houses receive $5,000 and travelling expenses every year. The territories are represented by one elected delegate in each case, who cannot vote in the house. The legislative powers of the congress are enumerated in the constitution. The supreme court of the United States can hear and determine issues of laws as to the interpretation of the constitution and may declare the acts of congress unconstitutional or *intra vires*, as the case may be. The federal judges are appointed by the president with the approval of the senate. A permanent civil service is being gradually built up, and removals from office in the case of officials, not political in their nature, are very much less frequent of late years with the institution of civil service rules.

Executive Power.—In each state there is a governor and a lieutenant-governor and officers to administer the government. The governor and lieutenant-governor are elected by the people for four years in following states: California, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Montana, Nevada, North Carolina, Oregon, Pennsylvania, Virginia, Washington, West Virginia, and Wyoming. In the following states the term is three years: New Jersey and New York. In the following, two years: Alabama, Arkansas, Colorado, Idaho, Iowa, Kansas, Michigan, Minnesota, Nebraska, New Hampshire, North Dakota, Ohio, South Carolina, South Dakota, Tennessee, Texas, Vermont, Wisconsin. In the following, the term is one year: Connecticut, Maine, Massachusetts and Rhode Island. All the governors have the power of veto over legislation except in Delaware, North Carolina, Ohio, Rhode Island. It requires a majority or two-thirds vote to over-ride the veto. The governor is the head of the executive and has no responsible ministers in the English or Canadian sense, but the executive or administrative officers are generally elected.

Legislative Power and Local Government.—In all the forty-five states there is a legislature of two houses; an upper house, generally called senate, and a house of representatives, both elected by the people of the state. In the following states the senate is elected for four years, the house of representatives for two years, and sessions are biennial, with the exception of the states mentioned: Alabama, Arkansas, California, Colorado, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Mississippi (annual), Missouri, Montana, Nevada, North Dakota, Oregon, Pennsylvania, South Carolina (annual), Texas, Utah, Virginia Washington, West Virginia and Wyoming. In the following states the term is for the senate two, for the house, two, and sessions biennial: Idaho, Michigan, Nebraska, New Hampshire, North Carolina, Ohio, South Dakota, Tennessee, Vermont. In the following states the term is one for both senate and house, and sessions annual: Connecticut, Maine, Massachusetts, Rhode Island. In Minnesota the term of the senate is two years, of the house one, and sessions annual. In New York the senate two, the house one, and the sessions annual. In New Jersey the senate three, the house one, and the sessions annual. Universal suffrage is the rule, though Delaware has a tax qualification in state senate elections. In some states the payment of a poll tax, illiteracy and residence enter into qualifications. In Colorado, Utah and Wyoming women can vote. Members of the legislature are paid. All public officials, state and municipal, are elected as a rule, but the tendency in the older states is to have a permanent public service apart from political heads. In 31 states the judges are elected by the people; in five, by the legislature; in eight, appointed by the governor, subject to conformation by the legislature or council. The Australian or Canadian ballot is now in force in 40 states; nine have passed stringent laws against corrupt practices at elections, but they are effective in only two or three states.

Throughout the union there is a very complete system of township, county, and city government. Township local government prevails in the New England states, the county is generally the unit in the south; in the middle and north-western states there is a mixed system. In several of the western states women can vote and be elected for councils. In all cases councils are elective. In the large cities there have been cases of gross corruption and mismanagement, and the best methods of improving municipal government are now attracting much serious attention.

MILITIA AND DEFENCE OF CANADA

Previous to the confederation of the Provinces, the defence of this country was entirely in the hands of the Imperial Government, who for that purpose maintained troops in each Province, supported by various local volunteer militia corps. This volunteer militia had, when called upon, rendered most efficient service in times of trouble.

After Confederation the British Government gradually withdrew all the Imperial troops from this country, and at present only maintain a garrison at Halifax, and a naval establishment there and on the Pacific coast.

By the British North America Act the command in chief of all naval and military forces of and in Canada was vested in the Queen, and the control of the same was placed in the hands of the Dominion Parliament. A Department of Militia and Defence was at the same time established, the first Minister being Sir George E. Cartier, and the first Militia Act was passed in 1868, 31 Vic., chap. 40. The Act was subsequently amended in various ways, but is practically embodied in the present Militia Act, 49 Vic., chap. 41 (Revised Statutes, 1886). By it the militia of Canada is declared to consist of all the male inhabitants of Canada of the age of 18 years or upwards and under 60, not exempted or disqualified by law, this population being divided into four classes, as follows:—

The first class comprises those aged 18 or upwards and under 30, being unmarried or widowers without children.

The second class comprises those between the ages of 30 and 45, being unmarried or widowers without children.

The third class comprises those between 18 and 45, being married, or widowers with children.

The fourth class comprises those between 45 and 60.

The following persons are exempt from enrolment and active service at any time: Judges, clergymen and ministers of all religious denominations, professors in colleges and teachers in religious orders, the wardens and officials of all penitentiaries and lunatic asylums, persons physically disabled, and any person being the only son of a widow and her only support. Certain other persons are exempt from service except in case of war.

The number of men to be trained and drilled annually is limited to forty thousand, except as specially authorized, and the period of drill is to be sixteen days and not less than eight days each year.

The Militia is divided into Active and Reserve land and marine force. The Active land and marine force is composed of men raised either by voluntary enlistment or by ballot, and the Reserve force consists, practically, of the whole of the efficient men not serving in the Active Militia of the time being.

The period of service is three years.

The following is an analysis of the Units which compose the Permanent and Active Militia of Canada, by arms of the service:—

RELIGIOUS STATISTICS OF CANADA.

The following table is a comparative statement of the numbers of the leading denominations in 1881 and 1891, showing also the proportion each denomination bore to the whole population at each census :—

*Pagans included.

Of the total number of churches, the Methodists have nearly 32 per cent., the Presbyterians and Roman Catholics 17 per cent. each, the Church of England 16 per cent., the Baptists 12 per cent., leaving 6 per cent. for "all others."

During the decade 1881-91, the Church of England appears to have been the most active in providing places of worship for the people, the Presbyterians coming next, the Baptists third, the Methodists fourth, and the Roman Catholics fifth.

THE KING'S LOYALISTS.

By E. A. Hart, Montreal.

Introduction.

In the good old times in Canada, before steamboats came into use, there were no good hotels, and travellers of high position, to secure comfort invariably carried letters of introduction to any wealthy hospitable family on their route. Between Quebec and Montreal in those days, only the North Shore land route was in use, and the voyage by calash was tedious and tiresome. The Harts, of Three Rivers, kept open house there from 1760 to 1840, and entertained almost every one of distinction who passed through Three Rivers during those eighty eventful years. The dukes of Clarence, Kent and Richmond were entertained by them, and from these and other notables information was obtained which now first appears in print. So far as regards the travel in summer, with the advent of the enlarged *Swiftsure* (1817) and the *Lady Sherbrooke* (1820) on the river, passengers began to travel by the steamboats, and the number of guests in summer fell off considerably, but no difference was seen in the winter until after 1840, when the family was obliged from illness and death to cease their hospitality. Their fine old library is destroyed, and not one stone is left of the famous old mansion occupied by them, and which was built by the French Intendant in the seventeenth century. A diligent reader in his youth, the writer obtained a fund of information from old family letters, pamphlets, and orally from members of the family, now dead, which he thinks should be made public, before he, too, joins his ancestry in their rest.

The King's Loyalists.

The King's American Loyalists was the name they called themselves by, and King's Loyalists for short. How, when, why or where the term United Empire Loyalists arose, I cannot say. It was not in common use to designate the loyalists by until the new immigration after 1815 set in. I have been told that the Right Hon. Edmund Burke first applied the term United Empire Loyalists to the King's Loyalists. If so, I have not seen it in his speeches, but the ponderous term sounds very much as if Burke did originate it. Be this as it may, the term was never used by the loyalists themselves, though their children adopted it, for the term King's Loyalists was obnoxious to other loyal Canadians, since it inferred that the American loyalists were the only loyalists in Canada. This is why the term United Empire Loyalists came into common use, clumsy as it is.

THE LOYALIST REGIMENTS.

Having recently been asked for what information I possess regarding these regiments, in order to trace up a family record, it may interest many persons to be told about them.

The first regiment raised for service in the colonies was the

60th Royal American Regiment.

This corps was a regular regiment of the line. It was raised at the beginning of the French and Indian war which resulted in the conquest of Canada. The regiment consisted of five battalions, a strength it retained until the close of the Napoleonic wars in 1815. When first raised, in the Carolinas, it was mainly recruited in the British Isles, the colonists disliking the restraints of military discipline, but during the revolutionary war the loyalists flocked into its ranks. At the close of this last war, the loyalists were allowed by the British Government to leave the regiment, provided they would settle in the provinces, and New Brunswick in particular was the gainer by this arrangement. When the loyalists left it, the regiment changed its uniform from scarlet to rifle green, and became noted as the King's Royal Rifle Corps, the title it now has.

78th Highlanders.

This regiment was raised by the Fraser clan for service in the colonies, and served with distinction at the battle of the Plains of Abraham on the 13th of September, 1759. The regiment was disbanded in Nova Scotia at the peace of 1763, and the men were given lands to settle on in the north of that colony.

84th Royal Highland Emigrants.

This regiment was also raised in the Scottish Highlands, mainly from the Macdonalds, Macdonuils or Macdonnells, at the outset of the revolutionary war. It served with distinction, defending Quebec from assaults and siege of the American forces in the winter of 1775 and '76, and was disbanded in Canada in 1784, the men settling on government land in Glengarry, Ontario, and in Cape Breton.

The Royal New York Regiment.

Commonly called the King's Royal New Yorkers, to distinguish them from other loyalist corps raised in the same colony. This regiment was raised by Sir John Johnson, Bart., of Johnson Hall, Tryon County (Mohawk Valley), for service in the revolutionary war. Though not a line regiment like the preceding, it was a regular British regiment for local service, similar to the Royal Canadian Rifles of our own times. Sir John Johnson remained as the colonel until the disbandment of the regiment in Montreal in 1784. The men settled on the north shore of the St. Lawrence, from Kingston to Coteau.

Royal New York Rangers.

The preceding regiments wore the scarlet uniform. The Royal New York Rangers was raised as a fencible regiment, and wore the fencible uniform of Lincoln green. It was hence always styled by the loyalists the Royal Greens, but was known as Butler's Rangers by the Continentals, Colonel Butler, its commanding officer, making the regiment a thorn in the side of the Americans. It was disbanded on the Niagara frontier in 1784, and the men settled on the Canada side. All the western posts in 1783, Chicago, Mackinaw, Detroit, Presqu'isle, near Buffalo, and Fort George, were garrisoned by detachments of the three last named regiments.

The Prince of Wales' Regiment.

Its full name was the Prince of Wales' Regiment of Loyal New York Volunteers. It was a partisan corps,

and not a regular regiment like the foregoing. The men settled in New Brunswick.

THE LOYAL AMERICAN RANGERS.

Also a partisan corps, often confounded by the Americans with the Royal Greens, because the uniform was Lincoln green. It was, however, a distinct regiment, one battalion of which met the misfortune of being captured in a transport. The men having given their parole not to serve against the Congress during the continuance of the war, the transport was released and the regiment proceeded on its way to Quebec. From Quebec they were sent to Fort Frontenac, now Kingston, and the entire regiment was disbanded there in 1784, and the men settled along the Bay of Quinte.

KING'S AMERICAN LEGION.

Also a partisan corps, of three battalions, disbanded at Halifax in 1783, and the men were settled along the western shore, at Annapolis, Digby and Windsor, in Nova Scotia. I cannot trace where the other regiments settled, there were a dozen other loyalist regiments, but the information, when necessary, can be obtained by searching the archives of the Horse Guards in London. The above-named regiments were those most noted in the war, and bore the brunt of the fighting, the line regiments not being of any use in the woods.

THE KING'S GERMAN LEGION.

American writers make the mistake of calling the above regiment Hessians. The Hessians proper were of no earthly use in the war. They were mercenaries and would not fight. They ran away at Trenton, they broke ranks at Saratoga. The Hessians were commanded by General Kuyphausen, a Wurtemberg noble, and when they surrendered to the Continentals, were sent into East Pennsylvania, where they became the ancestors of the "Pennsylvania Dutchmen," a well known element of the population in the anthracite coal regions. The King's Own Hanoverian subjects were very different to the Hessians. They were good, stubborn fighters, and when the war was over they would not settle where the Hessians were, but were sent to Nova Scotia, where the soldiers of the King's German Legion founded the settlements in Lunenburgh, while one battalion founded Charlottenburgh, and settled with the other loyalists along the Bay of Quinte, and along the St. Lawrence river. The thirty battalions of loyalist soldiers at the close of the war, who settled in the provinces, must have numbered little less than twenty thousand men. They were encouraged to marry before disbandment to fit them for being military colonists, and they brought their families with them. The civilian loyalist settlers outnumbered the soldiers, they all brought their families with them, and it is absolutely certain that the loyalist exodus consisted of not less than ONE HUNDRED THOUSAND MEN, women and children. They settled on the west shore of Lake Ontario, and in the region north of Vermont and Lake Champlain. The county of Leinster, in Lower Canada, was set apart for their settlement; it has since then been formed into three counties, Terrebonne, Two Mountains and Argenteuil. All along the Ottawa and the St. Lawrence rivers they settled. They were in the District of Three Rivers in large numbers; Sorel, or William Henry, as they called it, was founded by them. The common statement that only ten thousand loyalists settled in the Dominion is one of the most absurd and ridiculous statements that could be imagined. There was no other immigration at that time, so there need be no mistake made. They did not come together, far from it; they could not because they could not sell their property, but they came when they could, between 1781 and 1810.

Butler's Rangers and Brant's Indians fought together in war, and when the peace came Brant's Indians settled on the Grand River, in rear of the Royal Greens. Many of the six hundred Canada Militia whom Brock led to the capture of Detroit, and who repelled the invaders at the battle of Queenston Heights, were sons of fathers who served in the Royal Greens. The children of the Royal New Yorkers fought and won the victory of Chrysler's Farm. The children of the 84th Sons of the Mist, but this time wearing the Lincoln green of the Glengary Fencibles, repelled the foes of their fathers at Chateauguay. The sons of the men who had served in the Royal Americans and the Prince of Wales' regiments drove the Americans from the New Brunswick frontier, and reconquered the whole of the Acadian part of the State of Maine, a conquest they held until the peace, and which should never have been given up. The story of the march of the New Brunswick regiments to the Penobscot river vies in heroism with any of the brilliant achievements of the Canada Militia.

His Blessed Majesty King George the Third, as the loyalists called him, was ever deeply interested in the welfare of 'his American subjects,' for so he styled them. Writing to his third son, Prince William Henry, duke of Clarence, then serving in the North American fleet, and about to visit Canada, the king charged his son "particularly to inquire into the condition and modes of living of 'my American subjects,' and whether they were prospering in their new homes, and to relieve any cases of distress he may find among them." This letter was shown to many in Canada by the duke of Clarence, who eventually became King William the Fourth. That the faithfulness of the loyalists had touched the king to his innermost soul was evident, for the duke of Kent told many in Canada that when his father's mind became clouded, there was no subject of conversation that he seemed to take any interest in, except when they spoke of the loyalists.

Now let us inquire into the results of the loyalist exodus so far as they affected the United States. That the removal of one hundred thousand people whose maxim in politics and in social life was "to fear God and honour the king," should have a very bad effect on those they left behind them, was a natural sequence. In the course of two generations, among the lower classes in the new states, a marked impatience of all the old time restraints was manifested. They had less fear of God, less respect for the law, less respect for vested rights, less respect for the marriage tie, than their colony bred revolutionary fathers had. All authority was more or less derided; there was little respect shown to grey hairs or old age, and when they grew to manhood, neither their parents nor their clergy had any restraining influence over them. So much did these evils show themselves that Puritan New England became alarmed at the probable disintegration of society,

and rightly ascribing the cause to the removal of the loyalists, the Massachusetts Puritans heartily wished for the success of the king in the war of 1812, that it may have a chastening effect on the people. The Puritans then saw that the loyalists were a bulwark against the tide of scepticism, agnosticism and infidelity which, set in motion by the French revolution, rolled across the Atlantic from Europe to America. Puritan New England, which started the revolution, to arrest its harmful effects gave its support to that political party which strove to oppose the principles of Hancock and Jefferson, and to this day the Republican party, which embodies in its politics the ideas of strength of government, respect for the law, and a fundamental respect for the vested rights of property, as opposed to the principles of the Jeffersonian democracy, finds its leaders in Puritan New England.

THE LOYALISTS WERE CHRISTIAN SOLDIERS.

Never was a civil war in the history of the world so humanely carried on. The loyalists would not permit of any outrages, even on the rebels, by the German and British soldiers in the revolutionary war, and they were powerful enough to restrain their barbarity. This clemency was a terrible mistake, politically speaking. It was the sole reason for the ultimate success of the rebels.

They came into Canada with their sword in one hand and their Bible in the other. The first Protestant church in Canada was established by them, for Christ Church at Montreal was founded by Sir John Johnson and other loyalists, the gentlemen and officers, members of the Loyal Colonial Club of Montreal. By 1810 the Anglican Church had a number of small but flourishing congregations, wherever there was a considerable loyalist settlement, from Newark to Quebec, a distance of six hundred miles.

The 84th Regiment was raised from Scottish Jacobite clans. They were all, or nearly all, Scotch Catholics. Their exemplary behaviour in Canada, and the uniform good conduct of the many Irish Catholic soldiers in the loyalist regiments, their courage and fortitude, had a far reaching effect. Prior to this time, no Irish Catholics were allowed to enlist into the army, but the British Government, disgusted with the Hessians, began to replace them with Irish Catholics. The two first Irish regiments, the 18th and 27th, were Protestant corps. After the misconduct of Baron Reidesel's Hessians at Saratoga, an Irish Catholic regiment, the Loyal Irish, was raised in Ireland for service in the West Indies. Here they distinguished themselves greatly, and they became a line regiment, the 85th King's Loyal Irish. Subsequently two more Catholic regiments were raised, the 87th Royal Irish Fusiliers and the 88th Royal Connaught Rangers. The title of the 85th being objected to by the last two regiments, the K. L. I. became the King's Light Infantry.

Without the Irish Catholic soldiers, the Peninsular War would not have been carried on, and Waterloo would have been a French victory. How much, then, does not the British Empire, Europe and the world owe to the American loyalists who first made use of the Irish Catholics as British soldiers.

Without the assistance rendered by the sons of the loyalists Britain would have had a hard task to have repulsed the American invasion of Canada in 1812 and 1813. She could not spare 5,000 soldiers from Wellington's army in those two years, while 50,000 Americans volunteered to invade the country, which they were sure was defenceless and would prove an easy conquest. The sons of the Royal Greens met the first array of the Americans, and that same array of the Americans marched into Montreal, without arms, as prisoners of war, the British drums and fifes of the Canadian Fencibles playing the Americans in to the tune of "Yankee Doodle!" At the end of the summer of 1814 there was not an American soldier in Canada, except as a prisoner of war. That a powerful British kingdom was founded and maintained in Canada by the King's Loyalists and their descendants there can be no question. It exists to-day, serving to bind the British Empire together. Many there are who dream of a time coming when Canada will have a larger population than will be then in the British Isles, and that the better order, security and justice of its people, their better form of government, the inheritance given to their Canadian posterity by the loyalists, will attract to Canada the best elements of the population of the United States. The King's Loyalists moulder in their Canadian graves, but their bodies hallow the soil, and Canada can never forget what it owes them. Long may their memory be cherished!

AFTER THE REVOLUTIONARY WAR

was over the fugitive loyalists at Three Rivers would often talk over the causes which led to the British defeat. The non-use of military severity to crush the rebellion, the loyalists alone were responsible for, but they blamed the generals for their incapacity also. General Burgoyne was considered a splendid officer, and so also was Sir William Howe, but Burgoyne alone was unfit to fight his way through the wilderness with a large army, and when General Fraser was killed Burgoyne seemed to have no officer he could rely on to do effective work. Outside the lords, Rawdon and Cornwallis, Tarleton and the Butlers, the army leaders inspired no confidence in the troops. The loyalists themselves produced no good leaders except the Butlers, for Sir John Johnston had no military ability, and the Butlers were not American loyalists, though placed in command of two of their regiments. The officers of the line regiments from Britain were greatly blamed by the loyalists for seeking after social pleasures and spending their time and money in giving balls and fetes to the American belles whose fathers and brothers were in the Continental army, or if they were with their families were disloyal to their king. This was a very sore subject to the loyalists, who bore the brunt of the hardships in the woods, while the line regiments served in the cities. The officers spent their money lavishly at New York, Newport and Philadelphia in entertainments which did not buy the loyalty of the people who might have been awed by severity, but who were of too vulgar a class, pioneers and adventurers, to be seduced or cajoled by music, dancing and fine suppers.

Sir Henry Clinton was hated and despised by the loyalists. Through his connection with the ducal house of Newcastle he could baffle all the efforts made by the good generals like Howe, Burgoyne and Cornwallis, for if Clinton could ruin a rival he would do it, though his king lost an empire. Howe left America in disgust. Burgoyne was ruined, and Cornwallis only missed the same fate through Clinton's treachery being found out. The loyalists always styled Clinton a traitor, even charging him with giving important information to the rebels. His cowardice was well known to them.

COINAGE IN CANADA.

In the early days all sorts of coin were used in British North America.

The first step taken in Canada for a revision of currency was in 1795, when, to remedy the evils resulting from the coined money in circulation being reduced in weight, debased in value and composed of every variety of pieces peculiar to all countries trading with this continent, an Act was passed which fixed a standard of value founded upon the average intrinsic worth of the gold and silver coins of Great Britain, Portugal, Spain, France and the United States.

Subsequently various Acts of the Legislatures established a valuation for these pieces, at which they were accepted in market overt.

Finally, in 1858, the Province of Canada adopted dollars and cents, pounds, shillings and pence as the only moneys of account. In 1871 the Federal Parliament passed the Act (Chap. 4, Acts of 1871) respecting the currency, which gave to the provinces of the Dominion a uniform currency, the single gold standard adopted being that of the British sovereign of the weight and fineness prescribed by the laws of the United Kingdom, to pass current at $4.86⅔. Provision was also made that, until otherwise ordered by Her Majesty's proclamation, the gold eagle of the United States, of the fixed weight of 10 pennyweights and 18 grains troy, and of a settled standard of fineness, should be legal tender in Canada. The same Act provided for a gold coinage for Canada, but special Canadian gold coinage has not been minted.

Silver coins were made legal tender to $10, and minor coin to 25 cents.

The silver coins in use are 50, 25, 20, 10 and 5 cents.

The Law Society of Ontario.

The Law Society was first established in 1797 by the Act 37, Geo. III., c. 13, which enabled the then practitioners of the law to form themselves into a society, and make rules for its government. By the Act of 1822, 2 Geo. IV., c. 5, "the Treasurers and Benchers of the Law Society" were formally incorporated; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. Under Revised Statutes of Ontario, c. 145, 1887, the Benchers are, exclusive of *ex-officio* members, elected by the Bar, the *ex-officio* consisting of the Attorney-General of the Dominion for the time being, if a member of the Bar of Ontario, and all members of the Bar of Ontario who have at any time held the office of Attorney-General of the Dominion or of Ontario, or of Attorney or Solicitor-General of the former Province of Upper Canada, and any retired Judge of the Superior Courts of Law or Equity of Ontario; the *elected*, thirty in number, being chosen by ballot, for a term of five years, by the members of the Bar, in manner prescribed by the Act. Vacancies during the term are filled by the remaining Benchers. On the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, who is also President of the Society. The Benchers sit in Convocation every term for the call of Barristers, the admission of Attorneys and Solicitors to Practice, and of Students to enter the Society, the fees paid by whom form the revenue of the Society. Osgoode Hall, appropriately named after the first Chief Justice, is the Ontario "Inn of Court," or head-quarters of the Society, in which is provided accommodation for the Court of Appeal and Courts of Equity, and for the sittings in term of the Superior Courts; with a valuable and extensive library.

The Supreme Court of Judicature for Ontario.

COURT OF APPEAL FOR ONTARIO.—Constituted for the hearing of appeals from the High Court of Justice, and from the County Courts. From the judgment of this Court an appeal lies, at the option of litigants, either to the Supreme Court of the Dominion, or to Her Majesty in Privy Council, in cases over £1,000, or where annual rent, fee, or future rights of any amount, are affected. The Judges of this Court may be placed on the rota for the trial of Election petitions, with the Justices of the High Court, who as *ex-officio* Judges of this Court, choose from their number a Judge or Judges to sit in Appeal in case of there being a vacancy in this Court, or if, from illness or some other cause, one of the Judges of the Court is unable to be present, or is under any legal disqualification to hear an appeal. Sittings are held at such times and for such periods as the Judges shall, from time to time, deem necessary or convenient for the speedy dispatch of business, the times now fixed being the first Tuesday in March and September, and the second Tuesday in January, May and November; notice of the holding of such sittings being given according to the usual practice. If required, a second division of the Court, consisting of Judges of the High Court, can also sit for the disposal of business.

Chief Justice of Ontario—Hon. John Hawkins Hagarty, D.C.L. ($6,000). *Justices of Appeal*—Hon. G. W. Burton, Hon. F. Osler, Hon. James Maclennan ($5,000 each). *Registrar*—Alexander Grant. *Usher and Messenger*—E. Oliver.

High Court of Justice for Ontario.

The jurisdiction of this Court extends to all manner of actions, causes and suits, criminal and civil, real, personal and mixed, within Ontario, and it may proceed in such, by such process and course as are provided by law, and as shall tend with justice and despatch to determine the same; and may hear and determine all issues of law, and also (with the inquest of twelve good and lawful men in the cases provided for) try all issues of fact, and give judgment, and award execution thereon, and also in matters which relate to the Queen's Revenue (including the condemnation of contrahand or smuggled goods) as may be done by Her Majesty's

Superior Courts of Law in England, and also the like jurisdiction as the Court of Chancery in England, in cases of fraud, accident, trusts, executors, administrators, co-partnerships, account, mortgages, awards, dower, infants, idiots, lunatics and their estates, waste, specific performance, discovery, and to prevent multiplicity of suits, and may decree the issue, repeal, or voidance of letters patent, and generally the like powers which the Court of Chancery in England possesses to administer justice in all cases in which there is no adequate remedy at law.

Divisional Court sittings are held every week to dispose of such matters as may properly be brought before a Divisional Court.

LAW CIRCUITS.—*Sittings for Hearing of Actions* (see p. 220).—In the Counties of York, Wentworth, Carleton and Middlesex, there is held an additional such Court in every year, in the vacation between Michaelmas and Hilary Terms; and in the County of York there is held another such Court, between Easter Term and the first day of July. Whenever in any year the judges may determine that it is not necessary to hold the latter such sittings may be dispensed with. The sittings for hearing of actions may, in the discretion of the Judges, be held separate and apart from the Courts of Oyer and Terminer, and General Gaol Delivery.

The Courts in each Circuit are presided over by the Chancellor or by a retired or present Justice of the High Court or of the Court of Appeal, or by a Judge of a County Court, or by some one of Her Majesty's Council learned in the law, requested by the Chancellor or one of the Justices to act in that behalf.

WEEKLY SITTINGS.—A Judge sits at Osgoode Hall every week except vacation for the purpose of disposing of all business except trials which may be transacted by a single Judge. Chamber business on Mondays and Fridays, motions first, appeals afterwards. Court business on Tuesdays, Wednesdays and Thursdays. Sittings will be held at Ottawa and London respectively at least one day in each week (except vacation) to dispose of certain matters which can be determined by a single Judge. The Judges have now power on petition to constitute monthly or semi-monthly sittings in lieu of weekly.

CHAMBERS.—Chambers are held each day for such business relating to actions as may be transacted by a single judge out of Court. The Master in Chambers is empowered to obtain the assistance of any Official Referee to sit with or for him.

LONG VACATION extends from the 1st of July to the 31st of August, both inclusive. There is also a vacation from the 24th December to 6th January, both inclusive.

HEIR AND DEVISEE COURT.—Commissioners, the Judges of the Superior Courts, and such other persons as may be appointed by commission under the Great Seal. Their duties are to determine claims to land in Ontario, for which no patent has issued from the Crown in favor of the proper claimants, whether as heirs, devisees, or assignees. Sittings at Toronto, first Monday in January and July in each year. *Judges*—The Judges of the Superior Court (*ex-officio*), others appointed by commission.

COURTS FOR THE TRIAL OF CONTROVERTED ELECTIONS.—The nature of these courts is sufficiently indicated in their title. In respect to elections for the House of Commons of Canada, the Superior Courts by one of their Judges appointed in that behalf, are invested with special Jurisdiction for the trial of contested elections, and appeals lie to the Supreme Court at Ottawa. In respect to elections for the Local Legislature of Ontario, the Judges of the Court of Appeal and of the Superior Courts of Law and Equity meet annually on or before the third day of Michaelmas sittings and severally elect, by a majority of votes, a Judge from their respective Courts to be placed on the rota for the trial of election petitions. In the case of death or the illness of a Judge so chosen, the Court of which he is a member meet and elect another Judge. Trials involving corrupt practices are presided over by two Judges, otherwise a single Judge presides, and an appeal lies to the Court of Appeal of the Province.

The County Judges are also Judges of the Surrogate Courts.

DIVISION COURTS are held for the summary disposal of cases by the presiding Judge, being the County Judge or his Deputy, or any Barrister appointed to hold the same; but a jury of five persons may be demanded in certain cases. Their jurisdiction extends to actions of debt or contract where the balance claimed is over $100 and under $200 and the original amount was ascertained by the signature of the defendant, and to $100 in other cases of debt, subject in some cases to an appeal to the Court of Appeal; but the sum of the account to be gone into cannot exceed $400; injuries or torts to personal chattels amounting to $60; and personal actions to that amount, if not excepted from their jurisdiction; but not to actions for gambling debts, liquor drunk in a tavern, or notes of hand given therefor, ejectment, title to land, &c., or any toll, custom or franchise, will or settlement, malicious prosecution, libel, slander, crim. con., seduction or breach of promise, or actions against a J. P. for anything done by him in the execution of his office, if he objects to it. Each Judicial District is divided into Court Divisions, and Courts are held once in two months in each Division, or oftener at the discretion of the Judge. The Divisions are established by the Courts of General Sessions, and in certain cases by the Judges.

THE LAW OF INTESTATES ESTATES.

DESCENT AND DISTRIBUTION OF PROPERTY.

As to all persons who died before the first day of January, 1852, the rules of descent are substantially the same as in England at that date.

Real estate of persons who died intestate (*i.e.*, who have left no will) after that date and prior to the first day of July, 1886, descends first to lineal descendants and those claiming by or under them *per stirpes*, second to father, third to mother, and fourth to collateral relatives, subject to certain rules and regulations prescribed in the statute.

The surplus personal estate of intestates who died prior to the first day of July, 1886, is, after the expiration of one full year from the death of the intestate, to be distributed in the following manner: One-third shall go to the widow of the intestate, and the residue in equal proportions to his children, or if dead, to their lineal descendants; if there are no children or legal representatives subsisting, then the widow takes a moiety, and the other moiety goes to the next of kindred, in equal degree, and their representatives; if no widow, all to children; if neither widow nor children, all to next of kin, in equal degree, and their representatives. But no representation is admitted among collaterals further than children of intestate's brothers and sisters.

All real and personal property of persons dying on or after the 1st day of July, 1886, devolves upon and becomes vested in the legal personal representatives for the period of a year (which may be extended in a prescribed manner) subject to the payment of debts and to the effectual dispositions of deceased. The real and personal property of a married woman, in respect of which she has died intestate, shall be distributed as follows: One-third to her husband, if she leaves issue, and one-half if she leaves none, and subject thereto, shall go as if her husband had predeceased her. The realty and personalty comprised in a residuary devise or bequest is (unless the will otherwise directs) applicable ratably according to their respective value to the payment of the debts.

Collegiate Institutes and High Schools.

Each of the High Schools (which form the intermediate link between the Public Schools and the Universities) is managed by a Board of Trustees, appointed jointly by the County and Town Councils. In cities the Trustees are all appointed by the City Councils, except where there is only one school in the County. The Principal must be a graduate of a British or Colonial University, and certified as experienced in teaching. Assistants must also have received the prescribed training. Besides fees, local rates must be raised. Every High School with two qualified teachers receives a fixed amount of $400, and also a certain sum on salaries of teachers, general equipment, suitability of school premises and attendance. High Schools which have an average attendance of 60 pupils, may be made Collegiate Institutes, and receive additional grant. Pupils attending these schools are prepared for Matriculation in the Universities. There were 37 Collegiate Institutes and 92 High Schools, with 24,662 pupils, in Ontario in 1895.

Public Schools.

Each Township is divided into School Sections of a suitable extent for one School; and in each of these Sections three Trustees are elected to manage its School affairs. In Cities, Towns and Villages, the Schools are managed by a Board of School Trustees elected from the Municipality. There were 5,991 Public (including 331 separate) Schools, with 484,551 pupils, in Ontario in 1895.

Educational Museum.

Connected with the Education Department is a Museum, containing specimens of school apparatus and furniture, a valuable collection of Italian, Dutch and Flemish Oil Paintings, and Statuary casts and busts. The Museum is freely open to the public from 9 a.m. to 5 p.m.

Total Number of Educational Institutions

Of all kinds reported by the Education Department as in operation in the Province of Ontario during 1895, was 6,126, attended by 510,456 pupils, and expending $5,267,468 in their support.

POSTAL INFORMATION.

For List of Officials Post Office Department see page 104.

Letter Rates, &c.

Canada.—Letters posted in Canada, addressed to any place within the Dominion, 3 cents per oz. If unpaid, such letters cannot be forwarded, but will be sent to the Dead Letter Office. If partially prepaid, the letter will be forwarded to its destination and double the deficiency charged on delivery. Letters mailed at any office for delivery at or from the same office, provided that the office is not one at which free delivery by letter carriers is established, are charged 1 cent per oz., and must be at least partially prepaid; otherwise they are sent to the Dead Letter Office. Letters of this nature mailed at and for delivery from an office at which there is a free delivery by letter carriers are liable to 2 cents per ounce. All postage must be prepaid by Postage Stamps.

Post Cards.—From any place in Canada to any place in Canada or to the United States, 1 cent each. British and Foreign, 2 cents each.

Private Post Cards.—Upon all cards intended for use as Private Post Cards the words "Private Post Card" must be distinctly printed or written. The name and address of the sender may be printed on the face of the card, but the face of the card is not to be used for advertising purposes. Private Post Cards must not exceed a size of 6 inches in length by 3⅝ inches in width, these being the dimensions of the larger official Post Card at one time issued by the Department. Cards exceeding these limits are to be treated as insufficiently paid letters. Private Post Cards are not transmissible to the United States.

United Kingdom.—Postage on Letters, 5 cents per half oz., whether by Canadian or New York Steamers. If sent unpaid, double postage will be charged.

Newfoundland.—Letters, 3 cents per oz. Newspapers, from office of publication for subscribers, free. Other matter same rates, etc., as to United Kingdom.

Bermuda.—Letters, 5 cts. per ½ oz. Newspapers and printed matter generally, 1 cent per 2 ozs.

United States.—The rate on letters to the United States is the same as in Canada, and at least one rate must be prepaid.

It is very important to bear in mind that the postage upon letters for the United Kingdom and all Foreign Countries is calculated by the *half ounce* and *double* postage is charged on all unpaid letters.

Registration of Letters.

Persons posting letters containing value should be careful to require them to be Registered, and to obtain from the Postmaster a certificate of receipt for Registration.

The charge for Registration in addition to the Postage, is, on all classes of matter, five cents.

Both the Postage charge and Registration fee should, in all cases, be prepaid by stamp.

Registration is not an absolute guarantee against the miscarriage or loss of a Letter; but a Registered Letter can be traced where an Unregistered Letter can not, and the posting and delivery or non-delivery can be proven.

Book Post, &c.

A Book Packet may contain any number of separate books. Limit of weight for domestic post, 5 lbs. (unless consisting of a single book, in which case a weight of 7 lbs. is allowed); for foreign post, 4 lbs. Limit of size, two feet in length, or one foot in width or depth.

Book Packets must be open at *both ends or both sides*, and must not contain any letter or sealed inclosure.

The rate on Book Packets between any two places in Canada is 1 cent per 4 oz. which must be prepaid by stamps.

The rate to Great Britain and the United States is 1 cent per 2 ozs.

Rates of Postage on Letters and Newspapers for Foreign Places.

The rates on letters and newspapers for all parts of the world (see exception for United States and Newfoundland) are 5 cents per ½ oz. for letters, and 1 cent per 2 ozs. for papers.

Miscellaneous Matter.

Miscellaneous matter, described as under, may pass between places in the Dominion of Canada upon prepayment of the rates indicated below. The regulations of the British Post Office do not admit of the transmission by mail to the United Kingdom (or other countries beyond the sea) of miscellaneous matter as such; but a great part of the matter referred to under that head may be forwarded to the United Kingdom by Book Post:—

1. On all pamphlets, occasional publications, printed circulars, prices current, hand-bills, and other matter wholly in print, and on packages of seeds, cuttings, bulbs, roots, bedding plants, scions or grafts, the rate is 1 cent for each 4 ozs. or fraction thereof.

2. On maps, prints, drawings, engravings, lithographs, photographs when not on glass or in cases containing glass, circulars produced by a multiplying process easy to recognize, exhibitor's entry tickets for Dominion or Provincial Exhibitions, botanical and entomological specimens when properly put up so as to prevent injury to the contents of the mails, sheet music whether printed or written, including music books whether stitched or bound (instruction books in music and instruction books in drawing accompanied by charts may however pass at Book-Post rate, which *see*), book or newspaper manuscript whether type-written or hand-written, printer's proof sheets whether corrected or not, such partly printed and partly written documents as deeds of land, mortgages made under seal (including chattel mortgages), insurance policies, renewal receipts when attached to the policies, insurance receipts sent in bulk from head offices to agents, militia and school returns, customs manifests, voters' lists when written or partly in writing, school or college examination papers, municipal assessment rolls, partly printed and partly written, Dominion and Provincial Government documents, statute labour returns, municipal returns in general, blank books, printed forms entirely blank, and printed stationery, the rate of postage is 1 cent for each 2 ounces or fraction of 2 ounces; and the postage rate must in every case be prepaid by postage stamps or stamped post bands or wrappers; provided that no letter or other communication intended to serve the purpose of a letter be sent or inclosed in any such package or thing mentioned, and that the same be sent in covers open at the ends or sides, or otherwise so put up as to admit of the contents being, if necessary, easily withdrawn for examination by the officers of the Post Office to ensure compliance with this provision; (if enclosed in sealed envelopes notched at the ends or sides, or with the corners cut off, letter rate of postage will be charged).

No packet of miscellaneous matter can be transmitted by mail if it exceeds 5 lbs. in weight, 24 inches in length or 12 inches in width or depth.

Legal and commercial papers generally (including Bank Pass-Books) are liable to *letter rate* of postage, except when sent as parcels by Parcel Post, and the exceptions above given to matter of that class are restricted to the documents specified, such as Deeds and Insurance Policies.

Newspapers and Periodicals.

Newspapers and periodicals *printed and published in Canada*, and issued not less frequently than once a month from a known office of publication to regular subscribers or news agents in Canada, the United States and Newfoundland, are sent free; and such newspapers and periodicals are to be put up into packages and delivered into the Post Office, under such regulations as the Postmaster-General may from time to time make.

On all newspapers and periodicals posted in Canada, for delivery in the Dominion, other than those addressed to regular subscribers or news agents, from office of publication, the rate will be *one cent per 4 oz.*, to be invariably prepaid by Postage Stamp.

Newspapers and periodicals weighing not more than 1 oz. each may be posted singly, if prepaid by Postage Stamp ½ cent each.

The postage on specimen newspapers, and on papers and periodicals published less frequently than once a month is one cent per lb.

British and foreign publications received by mail may be reposted in Canada to subscribers in Canada at the rate of 1 cent per lb.

Transient Newspapers.

Transient newspapers and periodicals include all newspapers and periodicals posted in Canada, *other than Canada newspapers sent from the office of publication, and British and foreign newspapers posted by news agents for regular subscribers* in Canada. When addressed to any place within the Dominion, or the United States, they must be prepaid the following rates by Postage Stamp:—

If weighing not more than 1 oz., half a cent each.

If weighing over 1 oz., one cent per four oz. or fraction of four oz.

On transient newspapers addressed to the United Kingdom, and all other Postal Union countries, the rate will be one cent per 2 oz.—to be prepaid by Postage Stamp. Canada newspapers *posted from the office of publication* to subscribers in the United Kingdom—sent in the Mails forwarded by Canadian Packet or *via* New York must be prepaid by Postage Stamp at the transient paper rate of one cent per 2 oz. The English Post Office requires *each newspaper or periodical* to each address to be prepaid by postage stamp. If sent in packages the English Post Office declines to deliver them.

Patterns and Samples within the Dominion.

Patterns and Samples of Merchandise and Goods for sale, not exceeding 24 oz. in weight, except samples of tea, which must not exceed 8 oz. in weight, may be posted in Canada, to be forwarded to any place within the Dominion, on prepayment by Postage Stamp of a rate of 1 cent per 4 oz., under the following regulations:

If insufficiently prepaid the packet will be forwarded charged with double the deficient postage, provided the deficiency does not exceed 5 cents.

Packages of Samples and Patterns, addressed to any place in Canada, may be registered by affixing thereto stamps to the value of 5 cents in addition to the postage rate, and provided such packet be handed into the Post Office for registration.

Patterns or Samples must be sent in covers open at the ends, so as to be easy of examination. Samples, however, of seeds, drugs, &c., which cannot be sent in open covers, may be enclosed in bags of linen, or such like material, fastened in such a manner that they may be readily opened.

The packet may bear on the *outside* the address of the sender, in addition to the address of the person for whom it may be intended; and also a trade mark or number, and the price of the sample enclosed; *inside*, there must be no enclosure but the samples or patterns themselves. The particulars, however, of the trade marks, numbers, and prices may be marked on the articles themselves instead of on the outside of the packet, at the option of the sender.

Goods sent for sale or in execution of an order, however small the quantity may be, or any article sent by one private individual to another, which are not actually trade patterns or samples, are not admissible.

United Kingdom, United States and Foreign Countries.

Patterns and Samples of Merchandise, when addressed to places in the United Kingdom must not exceed 5 lbs in weight, and to the United States and other foreign countries 8 oz., and must be prepaid by postage stamp at the following rates:—1 cent per 2 oz. or fraction of 2 oz., with a minimum prepayment of 2 cents covering a weight of 4 oz.

Useful Hints.

Register all valuable letters. Transmit money by Money Orders. Make complaints and inquiries in writing, and address the Postmaster-General at Ottawa. Preserve, and request correspondents to preserve, envelopes of missent or delayed letters. Send to the Postmaster-General envelopes of letters about which you seek information or make complaint. In addressing letters add the name of the *County* and *Province* in which the office addressed is located. Place stamp on the right hand upper corner of the address side. Put your own name and full address in or on letter, to insure return if it cannot be delivered. In affixing postage stamps moisten the envelope, *not the stamp*. When stamps are moistened the gum is apt to be removed.

Parcel Post.

The charges on Parcels by the Parcel Post to places within the Dominion, is 6 cents for every 4 oz. or fraction thereof (with 5 cents additional if Registered). No letter must be inclosed; if any discovered, the amount paid will be forfeited, and the Parcel charged at unpaid Letter rates. No Parcel must exceed 5 lbs. in weight, and must be prepaid by stamps.

Eye-glasses and spectacles may be sent by mail when properly put up and prepaid by Parcel Post or as fifth class matter.

Parcel Post with the United Kingdom, Newfoundland and other British Colonies and Foreign Countries.

Closed parcels may be exchanged with the United Kingdom, Newfoundland and most foreign countries and British colonies under the following regulations:—

1. The dimensions of a Parcel must not exceed 2 feet in length by 1 foot in width or depth.

2. A Parcel must not contain any explosive, combustible, or dangerous articles, nor any article of a perishable or fragile character, nor liquids or matters likely to injure other Parcels or mail transmissions.

3. All Parcels must be securely and substantially packed and closed.

4. Each Parcel must be plainly directed, and such direction must include the name and full address of the person for whom the Parcel is intended.

5. For each Parcel the sender must fill up a Customs Declaration. On this form the sender will supply an accurate statement of the contents and value of the Parcel, also the address thereof, with signature and place of abode of the sender. The Customs Declaration must be securely affixed by mucilage or paste to the Parcel to which it relates.

Parcels from the United Kingdom or any other place beyond the Dominion will be liable to Canadian Custom duties, and under existing regulations must be examined for the purpose by an Officer of the Customs *in the presence of the persons addressed.*

Rates and limits of weight vary. See Postal Guide, or enquire at Post Office.

Prepayment by postage stamp is required in all cases. Parcels must be handed to the Postmaster; in no case should they be dropped into a letter box or other receptacle for mail matter.

Fifth Class Matter.

Postage rate once cent per ounce or fraction of an ounce, to be prepaid by postage stamp. Miscellaneous articles of merchandise, including seeds, bulbs, etc., to United States, and generally all matter permitted to pass by mail in Canada, which is not of the nature of a letter, and therefore subject to letter rate of postage, and not entitled to be posted at a lower rate than 5th class under one or the other classes, may pass as 5th class when addressed to any destination within the Dominion or United States. Fifth class matter must be so packed or put up as to be open to examination of contents and must not exceed 5 pounds in weight, nor 2 feet in length by 1 foot in width or depth. When passing between Canada and the United States it will be subject to Customs regulations if liable to duty. The registration charge on 5th class matter is 5 cents in addition to postage.

FISHERIES PROTECTION AND MARINE SERVICE OF CANADA.

For a descriptive article upon the organization, uniform and equipment of this Service, and the duties performed by it, see the CANADIAN ALMANAC for 1895, page 227.

Since the compilation of that article, the following vessel has been added to the squadron: the "Osprey," a vessel of 125 tons, built at Shelburne, N.S., by Mr. J. McGill, after Commander Spain's own ideas and named after him; this cruiser he expects to be the fastest sailing schooner of her class in the waters of this continent. She will carry a crew of three officers and twenty men, and will be armed with two twelve-pounders, and her crew with rifles, revolvers, and cutlasses. Mrs. Davies, the wife of the new Minister of Marine and Fisheries, honoured with her presence the launching of the vessel, and performed the ceremony of christening the new cruiser.

The regular drill of the Force during the past season has been very rigorously kept up, and the signal classes carried on with great care, the men comprising the command being very quick and smart at picking up Morse and semaphore signalling. The high state of efficiency to which this small but serviceable armed force has been brought, and the regular work which it carries out on our seaboard, are now too well known to require further comment.

The following is a list of the vessels under Commander Spain's orders, the marine vessels being also included, corrected to September, 1896.

THE LAKE ST. JOHN TERRITORY.

The territory in question extends from the head of navigation of the river Saguenay, at Chicoutimi, to the northern boundary of the Province of Quebec, a distance of 220 miles, and from the sources of the waters flowing into Lake St. John, from the East, to the river St. Maurice, and embracing the valley of the river Batiscan, a distance of 200 miles, the whole forming an area of 44,000 square miles or about 28,000,000 acres. Comparatively little is known of this great country, with the exception of the valley of Lake St. John, which, within the last few years, has been colonized with great rapidity, and now contains a population of some 40,000.

The Saguenay and St. Maurice regions are already the field of large lumbering operations, estimated at 60,000,000 feet, B.M., per annum, or equivalent to nearly one-fourth of the whole export of sawn lumber from the port of Quebec. The country is thus described by a gentleman who visited it recently:

The Soil "Is almost universally composed of a rich grey clay, the land seems to be inexhaustible. At Pointe-aux-Trembles I was shown a field of wheat, which had been producing that grain for the last fifteen years, without the application of any manure; and the grain I saw this year was as fine as any to be found in this district. Truly one is struck with wonder at the richness of the soil, for I believe there is none richer in Canada."

The climate of the Lake St. John region is said to be that of Montreal; there is no doubt of its being superior to that of Quebec. The snowfall is certainly less. In fact, farmers complain that they do not get good sleigh roads till late in the winter. On the 25th September this year I remarked that the leaves of the trees were very little tinted, and potato stems were still green. Wheat and all grains ripen and produce abundantly, as may be seen from the following extracts taken from the census returns:

	1861.	1871.	1881.		1861.	1871.	1881.
Wheat, bushels	10,912	136,099	154,589	Hay, tons	3,648	5,966	16,347
Oats, "	39,316	117,249	211,216	Butter, pounds	61,777	148,106	393,127
Barley, "	30,922	71,210	47,025	Head of live stock	18,746	44,772	59,797
Other Grains	.....	.....	108,183	Tobacco, pounds	.....	.....	67,437
Potatoes, bushels	101,382	156,996	287,238	Population	10,478	17,493	32,409

Potatoes, carrots and other vegetables yield abundantly and are of immense size. Wheat is of course the great test of the soil and climate of any agricultural country. Let us then compare its production at Lake St. John with the best districts of the Province, viz: The Eastern Townships, and we find that the census returns show in 1881:—

	Population.	Bush. Wheat.	Bush. per 1000 of pop.
Chicoutimi	32 409	154,589	4,800
Compton	19,581	34,181	1,800
Stanstead	15,556	37,727	2,400
Huntingdon	15,495	24,378	1,600

Comparison between the temperature, and snow-fall at Roberval and at other places in Canada, each winter season (from January to March inclusively) and each summer season (from July to September inclusively). The observations for Roberval extend from April 1888 to May 1890, inclusively; those for Moose Factory, James Bay, from the year 1877 to the year 1882. All these observations are taken exclusively from the official reports of the Meteorological Department at Toronto.

LIFE INSURANCE.

There are at present thirty companies engaged in the business of life insurance in Canada. Of these twelve are Canadian, eight British, and ten American. During the year 1895, which is the last one of which we have returns, there was $44,341,198 new insurance taken, which was less by $5,184,059 than in 1894.

The total amount of insurance in force at the end of 1895 was $319,257,581, divided as follows :—

Canadian companies	$188,326,057
British do	34,341,172
American do	96,590,352
	$319,257,581

During the year the amount of insurance terminated by natural causes, that is by death or maturity, was $5,274,017, while the amount surrendered or lapsed was $29,842,268.

The premium income during 1895 was as follows :—

Canadian companies	$5,702,783
British do	1,137,366
American do	3,452,208
	$10,292,354

The total amount paid to policy-holders during 1895 was as follows :—

Death claims (including bonus additions)	$3,148,951 69
Matured endowments do ...	813,519 30
Annuitants	40,528 51
Paid for surrendered policies	702,055 33
Dividends to policy holders	1,157,392 62
Total	$5,862,447 62

In selecting a company in which to insure one's life, the first consideration should be safety, and economy the second. As the taking of a policy is a matter of importance to most men, they should be sure that the company they are going into is sound financially. Every year there is published by the Superintendent of Insurance at Ottawa a report containing the true financial position of all the different companies, a little study of which will make it plain to any business man.

The following table gives the premiums charged by some of the principal life insurance companies for insuring $1,000 at different ages. Besides the "straight life" insurance there are other attractive plans given by most of the companies, such as "endowments," "limited payments," "terminal" and "semi-tontine," etc., all of which will no doubt be explained by the enterprising agent, and should be carefully considered in all their bearings by the intending insurer :—

Annual Premiums, at Different Ages, with Profits.

The following table gives the annual premiums to secure $1,000 payable at death with profits at the ages given :—

Many other plans of Life Insurance are presented by the various companies, each possessing its own peculiar advantage. The two leading schemes beside the regular straight life plan are the ten, fifteen and twenty payment Life and the Endowment policy. Under the first of these arrangements the insurer pays a premium for ten, fifteen, or twenty years as the case may be, and his policy is then paid up. He has nothing more to pay. In the event of his death occuring any time after the first premium is paid the amount of his policy is paid to his heirs, or as he may direct. After the policy is paid up, if it is a participating one, it continues to receive profits, which either take the form of additional insurance or are paid out in cash dividends.

Under the **Endowment Plan** the insurer pays the premium for ten, fifteen, twenty or twenty-five years according to the term of his policy, and at the end of that term the amount of his policy becomes payable. Should his death occur at any time after insuring, the amount is paid to his heirs just the same as an ordinary life policy. The advantage of an arrangement of this kind is that a man may make provision for his old age. Paying a slightly higher premium he makes sure of a sum coming to him when perhaps he is unfitted for business. At the same time his life is insured should he die previously.

The following table gives the rates of some of the principal companies under the plans outlined above.

In thus quoting rates it is only fair to state that *cheapness* is not the only or the principal thing that an intending insurer should look for. Among other things to be considered are, policy advantages and profits, extended insurance, etc.

Many other attractive plans of insurance are devised by different companies and the editor has been requested to represent some of them to the advantage of individual companies. This would be manifestly unfair in an article such as this, and we can only direct our readers to our advertising pages, assuring them that all companies represented there are well worthy of their confidence.

ARE YOU RUPTURED?
THEN TRY THE
WILKINSON TRUSS
For safety, comfort and durability it is unequalled, and is warranted to hold any reducible hernia. This Truss, on account of the pivot point, adapts itself to any motion or position of the body, so that when a proper fit is secured its presence is never known. There is not a Truss in the market giving anything like the satisfaction of the WILKINSON TRUSS. *See testimonial below, and call or write for many others from leading physicians and wearers of the Truss.*
B. LINDMAN,
Rossin Block, 85 York St., Toronto, Ont. Expert in the Mechanical treatment of Hernia or Rupture.
W. J. C. Allen, of McDonald & Allen, Kingston, Ont., writes under date Sept. 16th, 1896, as follows:—"I have been badly ruptured for the past nine years, and during that time have been fitted with many different kinds of trusses, manufactured not only in Canada but in the United States, without obtaining relief. On April 19, 1896, I purchased from you a Wilkinson Truss, being advised by a physician to do so, and I feel confident that I am now perfectly cured. I can assure you that I feel thankful for the results, and if you wish you can refer to me for reference."

REVERSIBLE RUGS

MADE FROM YOUR OLD CARPETS

We beg to call the attention of the public to our Rugs, produced from Old Carpets, or pieces of Carpet.

Our Mr. FRED BULLOCK has invented and obtained a patent for manufacturing these beautiful Rugs. The great benefit to be derived from his invention is, that old worn carpets can be utilized in the production of Rugs of the most beautiful design and finish, that would otherwise be cast out as worthless.

All Rugs are woven reversible, and are superior to anything offered for sale. We make any size, from small Door Rugs to large Art Squares.

A card from you will bring our traveller with samples and prices. Or call at
